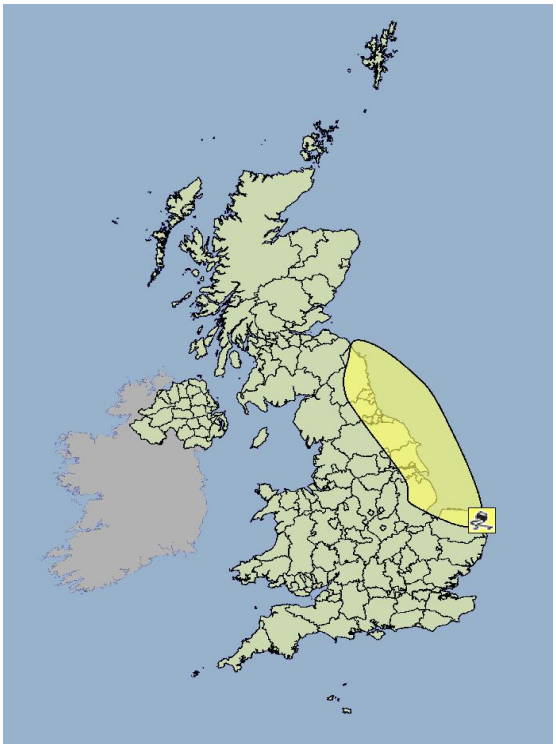
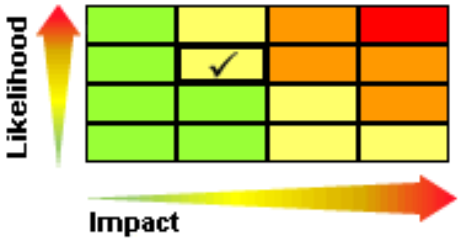
National Severe Weather Warning Service





Chief Forecasters Assessment
Temperatures will drop below freezing during Wednesday evening or night, especially inland, leading to a risk of ice on untreated surfaces. In addition, sleet and snow showers will be running in from the North Sea, potentially causing localised wash-off where roads have been treated. Locally a centimetre or two of snow may also fall over parts of high ground in the North Yorkshire Moors and Cheviots.

The Met Office have issued a **Yellow Warning** of **Ice**

Valid from **19:00 on Wed, 08th Feb 2017** until **10:00 on Thu, 09th Feb 2017**

Icy patches are expected to form on untreated surfaces during Wednesday night and early on Thursday morning, especially where there are sleet and snow showers.

There is a chance of locally difficult driving conditions on untreated roads and slippery conditions on pavements and cycle paths are also possible.
